

University of Washington

Department of Applied Mathematics

Required	Strongly Recommended	Minimum Requirements	Other factors
We require a minimum GPA of 3.0; for GRE scores we do not have a required minimum score.	In addition to the minimum requirements, we strongly recommend undergrad courses in linear algebra, differential equations (ordinary and partial), and some programming experience (familiarity with Matlab, R, Python or C++).	We require a bachelor's degree in mathematics, applied mathematics, or a related field (e.g., physics, engineering, etc.) prior to enrollment in our graduate program. But, the degree can (and often will) be awarded after the application is submitted. A minimum GPA of 3.0 is required by the UW Graduate School for admission, however, admitted applicants tend to have significantly higher GPAs. We also require GRE General scores, 3 letters of recommendation, a personal statement, and a resume or CV.	We are interested to know why students would like to pursue a PhD specifically in our department and this weighs in our admissions decisions.

Current Practice on Application Fee Waiver: Contact department for more information.
