

# MASTER OF PUBLIC HEALTH

---

*The Drexel Dornsife Master of Public Health curriculum (redesigned in 2017), provides students with a unique set of skills needed to make a difference, take on new public health challenges, and succeed professionally. The program is grounded in the School's expertise in urban health, but prepares students to improve health in all types of communities around the country and the world.*

---

## **A New Approach to the Master's in Public Health**

- Experience integration and interdisciplinary from the first day of classes.
- Design your degree – specialize through a broad range of majors and minors.
- Develop expertise through extensive opportunities for practice and research.
- Graduate in only five quarters. Get a head start in the job market.

## Majors

All full-time Master of Public Health (MPH) students must select a major at the time of application from the following list of choices:

- Community Health and Prevention
- Environmental and Occupational Health
- Epidemiology
- Health Management and Policy

## Executive Master of Public Health

Designed for working professionals, this combination online/on-campus program is tailored for individuals committed to advancing their careers and working in leadership roles in public health.

## Graduate Minors

- Biostatistics
- Environmental and Occupational Health
- Global Health
- Health Economics
- Human Health Risk Assessment
- Infectious Disease
- Latino/Immigrant Health
- Lesbian, Gay, Bisexual, and Transgender Health
- Maternal and Child Health
- Program Monitoring and Evaluation
- Public Health Emergency Preparedness
- Public Health Ethics and History
- Substance Use and Misuse
- Urban Health

## MPH Practical Experience

All MPH degree students develop skills in basic public health concepts and demonstrate a capacity to apply these concepts through a practical experience relevant to their area of specialization. The practical experience is an applied, field-based requirement that gives students experience in the practice of public health requiring depth (120-240 hours in a field placement) and breadth (one experience per month) — including participation in short-term volunteer opportunities and participation in on- or off-campus learning opportunities.

## Integrative Learning Experience

The integrative learning experience (ILE) is the culminating requirement for MPH students. The integrative learning experience can be coordinated with the field-based practical experience requirement.
