
MATHEMATICS

AT THE UNIVERSITY OF
CALIFORNIA RIVERSIDE

MATHDEPT.UCR.EDU

$$R_{\mu\nu} - \frac{1}{2}g_{\mu\nu}R = 8\pi k T_{\mu\nu}$$

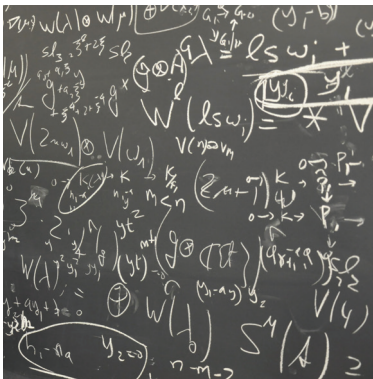

THE SUM OF YOUR SUCCESS

- Furthers mathematical knowledge, literacy and productivity of a diverse workforce at the national and international levels
- Encompasses research areas ranging from algebraic geometry, applied mathematics and functional analysis to mathematical physics, probability theory, and quantum groups
- Emphasizes strong collaboration among graduate students, faculty, and other research partners
- Prepares graduate students to conduct quality research in universities, labs, or industry and to take on leadership roles in educational communities

DEGREES

The Graduate Program in Mathematics awards M.A., M.S., and Ph.D. degrees with the following core concentrations:

- Algebra/Algebraic Geometry
- Applied Mathematics
- Complex Analysis
- Real Analysis
- Topology/Differential Geometry
- Partial Differential Equations

FINANCIAL AND GRANT SUPPORT

Most admitted Ph.D. students are supported through multi-year fellowships that may include stipends, full or partial payment of tuition/fees, and teaching and/or research assistantships.
